Objective

Experienced Mobile App Developer with expertise in API integration, Play Store publishing, and real-time applications. Passionate about **transforming creative ideas into fully functional apps** using Flutter. Known for building **innovative and impactful solutions**, including ML-powered tools and peer-to-peer delivery systems. Always exploring new technologies like Blockchain to solve real-world problems and deliver value through user-centric development.

Education

• Pursuing BTech(3.2) – Computer Science Engineering in RGUKT Srikakulam with 8.3 CGPA (2022-2026)

• Completed Pre-University Course in RGUKT with 9.8 CGPA (2020-2022)

• Completed SSC in Aditya Public School (State Board) with 10/10 CGPA in 2020.

Experience

1) Flutter App Developer Intern – Indiazona (E-commerce Marketplace)

📅 *Nov 1, 2024 – Dec 7, 2024 (Remote)*

• Developed and optimized e-commerce features using Flutter for a smooth user experience.

• Integrated APIs to handle product listings, cart management, and order processing.

• Enhanced UI/UX for better navigation, responsiveness, and performance.

• Collaborated with backend developers to implement Firebase authentication and real-time database functionalities.

2) Freelance Flutter App Developer

📅 *Jan 2023 – Present | Remote / Self-Driven*

• Built and published multiple Flutter apps on the Play Store with real-time use cases.

• Specialized in **app architecture, API integration, Firebase services, and UI/UX design**.

• Converted creative ideas into production-ready apps including:

  ○ **LazyCat** – a peer-to-peer campus delivery app approved by college administration.
  ○ **Earn By Ads** – a monetized app with 1.8K+ International installs and ad-based income generation.
  ○ **Multi Quotes** – an ML-powered quote recommendation app with Hugging Face integration.

• Demonstrated ability to take projects from idea to deployment, independently handling both frontend and backend integration.

Technical Skills

• REST API   • Machine Learning Integration   • Blockchain Development

• Play Store Publishing   • Firebase Services   • Xcode IOS Development

---

Projects

1) LazyCat (Real-Time Campus Delivery System | Approved Campus Startup**)**

• Developed a **peer-to-peer delivery app** where students fulfill food and parcel requests for small rewards.

• Students deliver food, Amazon parcels, and items for small payments to each other.

• **Approved and appreciated by campus dean**; to be implemented as an official **college business model** with a revenue-sharing system for administration.

2) Multi Quotes

GitHub Link:

⊕ GitHub - Chandu-geesala/ML-based-Quotes: Gives Quotes based on User Interaction

• A smart quote recommendation app powered by **Machine Learning**.

 • Implemented **Multi-Language Translation** using **Google ML Kit**.

 • Developed an **ML model** to suggest similar quotes based on user preferences.

 • Hosted the model on **Hugging Face** using **Flask API** for seamless backend integration.

3) Earn By Ads

App Link : https://play.google.com/store/apps/details?id=com.chandu.earnbyads

• Designed an **income-generating app** where users earn by watching ads.

• Integrated **Google Ads**, allowing users to watch up to 40 ads per day.

• Revenue-sharing model – A portion of ad earnings is distributed to users.

• **Performance Stats:**

   - 1.8K Play store Installs

   - Generated $85+ in revenue so far.
