Objective

Aspiring Flutter Developer skilled in building cross-platform apps for Android, iOS, and Web. Experienced in API integration, real-time systems, and deploying apps to both Play Store and App Store. Passionate about developing impactful solutions, from campus startups to apps for NGOs with large social reach, while continuously exploring innovation in ML, Blockchain, and scalable mobile technologies.

Education

• Pursuing BTech(4.1) – Computer Science Engineering in RGUKT Srikakulam with 8.3 CGPA (2022-2026)

• Completed Pre-University Course in RGUKT with 9.8 CGPA (2020-2022)

• Completed SSC in Aditya Public School (State Board) with 10/10 CGPA in 2020.

Technical Skills

• REST API	• Machine Learning Integration	• Firebase Services
• Play Store Publishing	• App Store Deployment	• CI/CD

Experience

1) Flutter App Developer Intern **– SenecaGlobal IT Soltuions**

📅 June 8, 2025 – August 8 ,2025 (On-site Hyderabad)

Project Link: https://park-sg.web.app

• Built and deployed a **Flutter-based Smart Parking Application**, officially adopted as an **Internal project for real-time usage** within the company.

• Gained hands-on experience with **Flutter Web deployment** and **CI/CD pipelines** for seamless updates.

• Learned corporate **on-site work culture**, team collaboration, and agile practices while delivering production-ready features.

2) Flutter App Developer Intern – Indiazona (E-commerce Marketplace)

📅 Nov 1, 2024 – Dec 7, 2024 (Remote)

• Developed and optimized e-commerce features using Flutter for a smooth user experience.

• Integrated APIs to handle product listings, cart management, and order processing.

• Collaborated with backend developers to implement Firebase authentication and real-time database functionalities.

Projects

1) Job Mailer – Automated Job Scraping & Cold Emailing Tool

• Built a smart automation tool to streamline cold emailing for job/internship hunting.

• Scrapes job & internship postings, fetches company websites, extracts HR/career-related emails.

• Provides user-friendly interface to select email content and send bulk mails automatically.

• Reduces manual effort in job search and increases outreach efficiency.

2) NGO Mobile Apps – Impact International & Lions International (Android & iOS)

AppStore Link : https://apps.apple.com/us/app/impact-international/id6751217554

Playstore Link: https://play.google.com/store/apps/details?id=com.gampa.impact

• Developed a cross-platform app for Impact International NGO (YouTube reach: 2M+ subscribers) to provide latest updates, event info, and community engagement.

• Features include news & updates, membership joining, event notifications, and NGO resources.

• Helped NGO strengthen digital presence and streamline communication with their wide social audience.

3) LazyCat (Real-Time Campus Delivery System | Approved Campus Startup**)**

• Developed a **peer-to-peer delivery app** where students fulfill food and parcel requests for small rewards.

• Students deliver food, Amazon parcels, and items for small payments to each other.

• **Approved and appreciated by campus dean**; to be implemented as an official **college business model** with a revenue-sharing system for administration.
